

PEPTIDES is a leader in the field of anti-aging technologies, an innovator in the field of peptide and non-peptide bioregulation.

We are engaged in the development of health products that slow down the aging of the body and improve the quality of life.

We make anti-age medicine accessible to millions of people around the world.

We create training programs for everyone who wants to lead a healthy and active lifestyle at any age.

CONSOLIDATED LIST OF PEPTIDE CODES.....	6A
MODERN WELLNESS CONCEPT	
peptide and non-peptide bioregulation	7A
REVILAB ML – anti-aging multifunctional peptide products.....	8A
RÉVILAB AGE-3 COMPLEX – an innovative trio to fight aging	12A
RÉVILAB SL – peptide complexes for sublingual use	14A
PEPTIDE COMPLEXES – complexes in solutions, natural peptides	18A
REVILAB ANTI-A.G.E. – a new word in modern anti-age medicine	23A
CYTOGENS – peptide bioregulators based on synthesized peptides	24A
CYTOMAXES – peptide bioregulators based on natural peptides	28A
ULTRASEPT – hygienic antiseptic lotion	35A
CYTOGENS LINGUAL – bioregulators based on synthesized peptides in sublingual form of application	36A
CYTOMAXES LINGUAL – bioregulators based on natural peptides in sublingual form of application	40A
VOLUSTOM is a complex based on dietary fibers	47A
THERAPEUTIC AND PREVENTIVE DRUGS – for health, beauty and active life	48A
INTERNAL MESOTELS – natural rejuvenators with antioxidants	68A
ONCOSERIES – progressive fighting technologies with the disease of the 21st century	70A
AYURVEDA TEA – tea drinks tested by time	72A
NB COMPLEX – the energy of stellar excellence, promising anti-age technologies	76A

Consolidated list of *peptide* codes

Natural Peptides

Peptide code	Peptide
A-1	pancreas
A-2	thyroid gland
A-3	vessels
A-4	cartilage
A-5	brain
A-6	thymus
A-7	liver
A-8	epiphysis
A-9	kidney
A-10	mucous membrane of the stomach
A-11	eye tissue
A-12	bladder
A-13	testicles
A-14	heart muscle
A-15	ovaries
A-16	prostate
A-17	adrenal glands
A-18	muscles
A-19	bronchial mucosa
A-20	bone marrow
A-21	parathyroid glands

Synthesized peptides

Peptide code	Peptide
AC-2	vessels
AC-3	liver
AC-4	cartilage
AC-5	brain
AC-6	thymus
AC-7	bronchopulmonary tree

Short peptides

Peptide code	Peptide
AA-1	epiphysis
AA-2	T-link of the immune system
AA-3	B-link of the immune system
AA-4	bone marrow
AA-5	brain
AA-6	retina
AA-7	vascular wall
AA-8	heart muscle
AA-9	cartilage
AA-10	liver
AA-11	pancreas
AA-12	testicles
AA-13	bladder
AA-14	bronchi
AA-15	lungs and stomach wall
AA-16	prostate
AA-17	muscles
AA-18	cerebral cortex
AA-19	thymogen
AA-20	glutathione
AA-21	male reproductive system

Modern *wellness concept* of peptide and non-peptide bioregulation

We live in a progressive world of high achievements and innovations, and medicine is now at such a high level that it allows a person to prolong his own life. However, what will this life be like? Everyone wants, even in adulthood, to be slim, energetic, and active, in order to enjoy life to the fullest. How to achieve this? How can we increase the vital resources of human life?

Peptides addresses these critical issues. Founded in 2010, the company has advanced scientific developments in the anti-age industry. Peptides researches and implements the latest methods of preventing aging, and develops and markets peptide and non-peptide bioregulators that prevent the risk of cancer and age-related diseases. Currently, the company's arsenal includes more than 300 unique products that have no analogues.

For more than 12 years our company has been making its unique contribution to improving the health of the population around the world. The results of many years of research have proven that peptide bioregulators are able to increase

the body's resistance to adverse factors and increase the resources of human life. Moreover, peptide-based drugs have a number of undeniable advantages:

- They effectively eliminate disorders of various body systems;
- They are compatible with each other and with other drugs;
- They have zero indicators of toxicity and do not cause withdrawal syndrome.

The creation of our bioregulators is based on decades of thorough work of various scientists. Their effectiveness and safety has been proven by numerous clinical trials. Each product presented by the company has all the necessary certificates and licenses, which you can see for yourself on the company's website.

We are confident that the introduction of such elements into the everyday life of millions of people around the world will ultimately significantly improve their quality of life.

rēvilab ML 01–09

Anti-aging multifunctional peptide products

The revilab ML line of multifunctional drugs is a complex of modern short peptides consisting of 2-10 amino acids. The peculiarity of revilab ML age protectors lies in the principle of their all-in-one action – when one capsule contains a whole set of peptide and non-peptide regulators, specifically selected to solve a specific problem.

All of the 9 products contain a range of short peptides, as well as antioxidants and cell building materials. Short peptide frag-

ments of revilab ML have a rapid effect on the restoration of the functions of internal organs.

These bioregulators of the latest generation are aimed at slowing down the aging process, maintaining a normal level of metabolic processes, and preventing and correcting various pathological conditions. They also help in the rehabilitation after serious illnesses, injuries and surgeries.

Use Recommendations for revilab ML products:

adults are recommended to take 1 capsule in the morning before meals. Duration of admission is between 4-6 weeks. If necessary, you can repeat the course of treatment one or more times throughout the year.

30 capsules

REVILAB	PURPOSE	RECOMMENDED	ACTIVE COMPONENTS
ML 01	Anti-age and neuroprotector	<ul style="list-style-type: none"> • For the prevention of oncopathology; • For antioxidant protection of the body; • To improve cerebral circulation; • To improve the work of the central nervous system; • For the prevention of heart attacks and strokes; • In case of autoimmune diseases 	Peptide complexes of the pineal gland (AA-1), B-link of the immune system (AA-3), liver (AA-10), resveratrol, choline bitartrate, omega-3 polyunsaturated fatty acids, vitamins E, A, C
ML 02	For the hematopoietic system, chemo-radioprotector	<ul style="list-style-type: none"> • In case of anemia of various origins; • In case of disorders of the hematopoietic system; • To increase immunity; • In case of metabolic disorders; • In the complex treatment of cancer patients; • To improve the tolerability of chemo-radiotherapy; • To increase the body's resistance to intoxications, infections 	Peptide complexes of the T-link of the immune system (AA-2), B-link of the immune system (AA-3), bone marrow (AA-4), liver (AA-10), omega-3 polyunsaturated fatty acids, vitamins E, B ₆ , B ₉
ML 03	For the nervous system and eyes	<ul style="list-style-type: none"> • In case of inflammatory and degenerative diseases of the nervous system; • For the prevention of eye diseases, visual strain; • In case of diseases of the retina; • In case of acute disorders of cerebral circulation (prevention and rehabilitation); • During the rehabilitation after head injuries 	Peptide complexes of the brain (AA-5), retina (AA-6), vascular wall (AA-7), astaxanthin, choline bitartrate, omega-3 polyunsaturated fatty acids, vitamins B ₁ , B ₂ , B ₆ , marigold extract
ML 04	For the cardiovascular system	<ul style="list-style-type: none"> • For the prevention of atherosclerosis, hypertension; • For the prevention of heart attacks and strokes; • For the treatment of varicose veins; • For the treatment of trophic ulcers; • For the treatment of thrombophlebitis; • In case of angiopathy 	Peptide complexes of the pineal gland (AA-1), vascular wall (AA-7), heart muscle (AA-8), resveratrol, rutin, omega-3 polyunsaturated fatty acids, vitamin PP
ML 05	For the respiratory system	<ul style="list-style-type: none"> • In case of chronic bronchitis; • In case of emphysema; • In case of respiratory allergies; • In case of bronchial asthma; • For the prevention of premature aging 	Peptide complexes of the T-link of the immune system (AA-2), bronchi (AA-14), lungs and stomach wall (AA-15), omega-3 polyunsaturated fatty acids, vitamins E, A, licorice root extract

REVILAB	PURPOSE	RECOMMENDED	ACTIVE COMPONENTS
ML 06	For the gastrointestinal tract	<ul style="list-style-type: none"> • In case of gastroduodenitis and ulcers duodenum; • In case of cholecystitis; • In case of pancreatitis; • In case of chronic intoxication; • In case of metabolic disorders; • In case of decreased liver function 	Peptide complexes of the liver (AA-10), pancreas (AA-11), lungs and stomach wall (AA-15), omega-3 polyunsaturated fatty acids, extracts of: licorice root, artichoke fruit, plantain leaves, strawberry leaves
ML 07	For the male body	<ul style="list-style-type: none"> • In case of urination disorders caused by diseases of the prostate; • In case of chronic prostatitis; • In case of prostate adenoma; • In case of erectile dysfunction; • To increase the functional activity of the male body; • To normalize the male hormonal status; • To normalize sperm motility 	Peptide complexes of the epiphysis (AA-1), vascular wall (AA-7), testicles (AA-12), bladder (AA-13), omega-3 polyunsaturated fatty acids, L-carnitine, zinc citrate
ML 08	For the female body	<ul style="list-style-type: none"> • To normalize the neuroendocrine system; • To normalize the cyclic processes in the body; • To normalize the functioning of the reproductive system and increase fertility; • To delay and smooth out the manifestations of menopause; • For the prevention of cancer; • For the prevention of disorders of the urinary system; • For the prevention of osteoporosis 	Peptide complexes of the pineal gland (AA-1), vascular wall (AA-7), cartilage (AA-9), bladder (AA-13), omega-3 polyunsaturated fatty acids, resveratrol, arginine
ML 09	For the musculoskeletal system	<ul style="list-style-type: none"> • In case of arthrosis and arthritis; • In case of rheumatism; • In case of osteochondrosis; • In case of osteoporosis; • In case of gout; • During the rehabilitation after injuries 	Peptide complexes of the B-link of the immune system (AA-3), vascular wall (AA-7), cartilage (AA-9), chondroitin sulfate, omega-3 polyunsaturated fatty acids, superoxide dismutase (SOD) and catalase, carnosine

rēvilab Age-3 Complex

NEW

Elements of health, youth and beauty — a unique innovative trio in the fight against aging.

The complex includes all the best, modern and progressive from the segment of anti-age medicine and cosmetology. A trio of new products will restore the youth, radiance and beauty of your skin. Thanks to the components included in the composition that act at the cellular level, the body is restored from the inside: the aging process slows down, the work of internal organs and body systems normalizes, and metabolism is activated and balanced.

The uniqueness of the trio lies in the synergy of powerful active ingredients that are a part of each product. To obtain the maximum effect, it is recommended to use the novelties of the Revilab series in the form of a complex treatment.

rēvilab Anti-A.G.E. Serum N°5

The pinnacle of technology in the fight against aging is the 3rd generation serum of the rēvilab series, based on the synergy of active and powerful ingredients, which helps prevent the development of signs of skin aging at the cellular level. rēvilab serum No. 5 activates metabolic processes in the skin, enhances the synthesis of collagen and elastin, improves immunity, as well as the adaptive and antioxidant potential of the skin.

The novelty contains a telomerase inducer that rejuvenates skin connective tissue cells, making them functionally active. Thanks to the telomerase inducer, the synthesis of hyaluronic acid, the utilization of old defective collagen and the synthesis of procollagen and, later, neocollagen are regulated. Powerful anti-glycants, represented by extracts of silk tree, Jerusalem artichoke and rosemary, fight glycation products in the skin, remove glucosamine cross-links of collagen to renew the matrix. The moderate muscle relaxant Leuphasyl helps to remove small ripples associated with hypertonicity of the facial muscles. The Neodermyl complex contains amino acids and copper, without which collagen assembly is impossible. SynColl is a proven matrikine (peptide) that stimulates collagen synthesis.

- Deeply moisturizes and tones the skin;
- Increases turgor, elasticity, density;
- Reduces wrinkles;
- Restores the lipid mantle;
- Levels the skin's surface;
- Improves the skin's texture;
- Restores healthy radiance and hydrates the skin.

rēvilab peptide collagen

An innovative peptide product created in accordance with the modern requirements of cosmetologists and clinicians, which has a high protective and antioxidant effect on the entire body.

The uniqueness of rēvilab collagen lies in the content of three types of collagen in combination with a fat-soluble form of vitamin C, which is necessary for the correct passage of all stages of formation and assembly of collagen in the body. Cartilage tissue peptide in the composition has a directed effect on connective tissue cells, giving a signal to start collagen synthesis in blood vessels, joints, bones and skin. Natural native collagen stimulates tissue metabolism, accelerates fibroblast proliferation, and prevents matrix aging. Fish collagen is a source of amino acids and peptides necessary to restart collagen synthesis.

- Improves the condition of the skin, hair and nails, helps smooth fine wrinkles, improves skin firmness and elasticity, slows down the aging process;
- Increases joint mobility, strengthens ligaments;
- Restores collagen reserves, stimulates the synthesis of its own collagen;
- Strengthens the structure of cartilaginous tissue, providing its strength and elasticity.

rēvilab pro elements

The latest development, which is an unconditional alternative to all previously created mineral drugs. The unique composition of the new product based on macro- and microelements, vitamins and minerals contribute to the correction of biochemical processes in the body, recharging of the mitochondria, and normalization of the immune system.

The unique combination of microelements activates skin regeneration processes, stimulates collagen synthesis in joints, blood vessels, bone and connective tissues, and slows down the cellular aging processes. rēvilab elements also has a positive effect on the production of sex hormones, qualitatively improving reproductive health.

The vitamin complexes included in the novelty are designed to combat aging: they increase skin firmness and elasticity, enhance healthy radiance and help resist the appearance of wrinkles, suppressing inflammation in tissues.

- Provides antioxidant protection of the body and minimizes the adverse effects of the environment;
- Replenishes the necessary amount of nutrients for the proper functioning of the mitochondria;
- Maintains the level of vitamins and minerals for the synthesis of sex hormones;
- Replenishes the lack of collagen;
- Prevents the appearance of wrinkles;
- Strengthens the structure of cartilaginous tissue, maintains joint mobility;
- Helps to slow down the aging of the body.

rēvilab Age-3 Complex An innovative anti-age trio

Active ingredients: glycine, calcium citrate, magnesium citrate, mineral premix (iron, zinc, copper, selenium, iodine, manganese), zinc citrate, vitamin A, vitamin E, vitamin D3, chromium picolinate, vitamin B6.

Active ingredients: AA-9 peptide complex (cartilage peptide), fish collagen, giant squid collagen (native collagen), ascorbyl palmitate (fat-soluble form of vitamin C).

Active ingredients: peptide complex (AA-1), Prodzia™ (Persian silk tree extract), Leuphasyl®, Syn@-Coll, Moist 24™, Neodermyl®, oils: argan, almond, jojoba; liposomes with rutinyl sulfate, magnesium ascorbyl phosphate, hydroxyproline, extracts of Jerusalem artichoke, red algae and caesalpinia prickly (Filmexel), rosemary CO2 extract.

rēvilab SL 01–10

Peptide complexes for sublingual use

The world's first series of multicomponent drugs for sublingual use, created to prevent dysfunctions of various systems and organs, and treat existing diseases. The effectiveness of this form of application is due to the fact that the drug enters the sublingual space, covered in a dense network of veins located superficially under a thin layer of the oral mucosa. The drug penetrates through the mucosa and directly enters the bloodstream of the superior vena cava, bypassing the portal vein system and the primary transformation in the liver. Taking into account direct entry into the systemic

circulation, the rate of the onset of the effect is several times higher than the rate of that when taking the drug in pill form.

The components of the rēvilab SL series drugs are peptides and extracts of plant-based origins, ideally combined with each other and targeting the root cause of diseases, as well as effectively preventing premature aging of the body.

revilab SL Use Recommendations:

Use in the mornings. Spread 4-6 drops over the mucous membrane of the mouth (under the tongue).

10 ml

REVILAB	PURPOSE	RECOMMENDED	ACTIVE INGREDIENTS
SL 01	For the cardiovascular system	<ul style="list-style-type: none"> •For the prevention of heart attacks and strokes; •During the rehabilitation after a stroke, heart attack; •For the treatment of varicose veins; •In case of arterial hypertension; •In case of trophic ulcers; •In case of thrombophlebitis; •In case of atherosclerosis of vessels and its prevention; •In case of angiopathy 	Peptide complexes of the vascular wall (AA-7), cardiac muscle (AA-8), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 02	For the nervous system and eyes	<ul style="list-style-type: none"> •In case of inflammatory and degenerative diseases of the nervous system; •For the prevention of eye diseases, also in case of visual overstrain; •In case of various diseases of the retina; •In case of acute disorders of cerebral circulation (prevention and rehabilitation); •During rehabilitation after head injuries 	Peptide complexes of the brain (AA-5), retina (AA-6), vascular wall (AA-7), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 03	For the immune and neuroendocrine systems	<ul style="list-style-type: none"> •In case of immunodeficiencies; •In case of allergies; •In case of autoimmune diseases; •For the prevention of oncological diseases; •After being sick; •In case of various chronic intoxications; •During rehabilitation after a heart attack or stroke; •After undergoing surgeries 	Peptide complexes of the pineal gland (AA-1), T-link of the immune system (AA-2), B-link of the immune system (AA-3), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 04	For the musculoskeletal system	<ul style="list-style-type: none"> •In case of arthrosis and arthritis; •In case of rheumatism; •In case of osteochondrosis; •In case of osteoporosis; •In case of gout; •During rehabilitation after injuries 	Peptide complexes of the B-link of the immune system (AA-3), cartilage (AA-9), muscles (AA-17), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 05	For the gastrointestinal tract	<ul style="list-style-type: none"> •In case of chronic pancreatitis; •In case of cholecystitis; •In case of cirrhosis of the liver; •In case of chronic intoxication; •In case of metabolic disorders; •In case of decreased liver function 	Peptide complexes of the liver (AA-10), pancreas (AA-11), lungs and stomach wall (AA-15), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 06	For the respiratory system	<ul style="list-style-type: none"> •In case of chronic bronchitis; •In case of emphysema; •In case of respiratory allergies; •In case of bronchial asthma 	Peptide complexes of the B-link of the immune system (AA-3), bronchi (AA-14), lungs and stomach wall (AA-15), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin

REVILAB	PURPOSE	RECOMMENDED	ACTIVE INGREDIENTS
SL 07	For the hematopoietic system	<ul style="list-style-type: none"> •In case of anemia of various origins; •In case of disorders of the hematopoietic system; •In the complex treatment of cancer patients; •To increase immunity; •In case of postoperative complications, trophic disorders 	Peptide complexes of the B-link of the immune system (AA-3), bone marrow (AA-4), vascular wall (AA-7), vitamins B ₁ , B ₁₂ , extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 08	For the urinary system	<ul style="list-style-type: none"> •For the prevention of diseases of the urinary system; •In case of urination disorders; •In case of chronic cystitis and pyelonephritis 	Peptide complexes of the T-link of the immune system (AA-2), vascular wall (AA-7), bladder (AA-13), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 09	For the male body	<ul style="list-style-type: none"> •In case of urination disorders caused by diseases of the prostate; •In case of chronic prostatitis; •In case of prostate adenoma; •In case of erectile dysfunction; •To increase the functional activity of the male body; •To normalize the male hormonal status; •To normalize sperm motility 	Peptide complexes of the epiphysis (AA-1), testicles (AA-12), bladder (AA-13), prostate (AA-16), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin
SL 10	For the female body	<ul style="list-style-type: none"> • To normalize the function of the neuroendocrine system; •To normalize all cyclic processes in the body; •To normalize the functioning of the reproductive system and increase fertility; •To delay and smooth the manifestations of menopause; •For the prevention of cancer; •For the prevention of disorders of the urinary system, especially during menopause 	Peptide complexes of the epiphysis (AA-1), vascular wall (AA-7), bladder (AA-13), extracts: licorice, propolis, mint, essential oils: chamomile, cloves, dihydroquercetin

SUBLINGUAL INTAKE OF REVILAB SL

↓ Application to the sublingual region of the recommended dose of revilab SL

Scheme 1. Benefits of sublingual drug administration

The sublingual method is optimal for the use of highly active substances in low concentrations, which include peptides. Bioavailability is provided by a high density of venous and lymphatic vessels in the mucosal and submucosal layer of the sublingual region and is not inferior to that of subcutaneous injections. Substances that enter the body by sublingual administration are not affected by digestive enzymes, the aggressive environment of gastric juice and enter the bloodstream, bypassing the liver. In official WHO documents, the sublingual method is recognized as a worthy alternative to subcutaneous administration. 2-5 mins.

2-5 mins

PC 01–19

Peptide complexes in solutions, natural peptides

Prior to this joint development by Peptides and the St. Petersburg Institute of Bioregulation and Gerontology, peptide bioregulators of natural origin were presented either in the form of injectable drugs or in the form of capsules for internal use.

As a result of the fruitful work of our scientists, a series of natural peptide bioregulators for external use has been

developed, which has passed the test of time and proved its effectiveness.

The resulting peptide complexes (PC) are applied to the inner surface of the forearm, along the course of the veins, and rubbed in until completely absorbed. After 7-15 minutes, the peptides bind to dendritic cells, which carry out their further transport to the lymph nodes, where the peptides shift places and are sent with the bloodstream to the desired organs and tissues.

Peptide complexes in solutions Use Recommendations:

Apply 6-8 drops to the inner surface of the forearm and rub until completely absorbed. The duration of the course is 1-3 months.
10 ml

Peptide complexes

PC	PURPOSE	RECOMMENDED	ACTIVE INGREDIENTS
PC №1	For arteries and heart	<ul style="list-style-type: none"> • For the rehabilitation of post-infarction and post-stroke patients; • For the prevention of atherosclerosis; • For the prevention of hypertension; • For the prevention of heart attacks and strokes 	Peptide complexes of vessels (A-3), liver (A-7), bioantioxidant complex "Neovitin"®, rosemary essential oil
PC №2	For the central and peripheral nervous system	<ul style="list-style-type: none"> • In case of inflammatory and degenerative diseases of the nervous system; • For the prevention of cerebral sclerosis and strokes; • During the rehabilitation after a stroke 	Peptide complex of the brain (A-5), bioantioxidant complex "Neovitin"®, grapefruit essential oil
PC №3	For the immune system	<ul style="list-style-type: none"> • To increase life expectancy; • For the treatment of pathologies of the immune system; • To stimulate the regeneration of all organs and tissues; • For the prevention of cancer 	Thymus peptide complex (A-6), "Neovitin"® bioantioxidant complex, lavender and jasmine essential oils
PC №4	For joints	<ul style="list-style-type: none"> • In case of arthrosis and arthritis; • In case of rheumatism; • In case of osteochondrosis 	Peptide complexes of cartilage (A-4), thymus (A6), bio-antioxidant complex "Neovitin"®, clove essential oil
PC №5	For bone tissue	<ul style="list-style-type: none"> • In case of fractures; • In case of osteoporosis; • For the prevention of premature aging 	Cartilage peptide complex (A-4), "Neovitin"® bioantioxidant complex, lemon essential oil
PC №6	For the thyroid gland	<ul style="list-style-type: none"> • In case of metabolic diseases; • In case of nodular and diffuse goiter; • In case of toxic and non-toxic goiter; • In case of hypo- and hyperthyroidism; • In case of autoimmune thyroiditis; • In case of a thyroid cyst; • In case of mastopathy 	Peptide complex of the thyroid gland (A-2), bioantioxidant complex "Neovitin"®, sage essential oil
PC №7	For the pancreas	<ul style="list-style-type: none"> • In case of chronic pancreatitis; • In case of diabetes; • In case of impaired glucose tolerance; • For the prevention of vascular complications of diabetes mellitus 	Peptide complex of the pancreas (A-1), bioantioxidant complex "Neovitin"®, juniper essential oil
PC №8	For the liver	<ul style="list-style-type: none"> • In case of metabolic diseases; • In case of chronic hepatitis of any etiology; • In case of biliary dyskinesia; • In case of obesity; • In case of cholecystitis 	Liver peptide complex (A-7), "Neovitin"® bioantioxidant complex, orange essential oil

PC	PURPOSE	RECOMMENDED	ACTIVE INGREDIENTS
PC №9	For the male reproductive system	<ul style="list-style-type: none"> • In case of chronic prostatitis; • In case of BPH; • In case of infertility; • In case of erectile dysfunction. 	Peptide complexes of vessels (A-3), brain (A-5), liver (A-7), bioantioxidant complex "Neovitin"®, cinnamon essential oil
PC №10	For the female reproductive system	<ul style="list-style-type: none"> • In case of chronic adnexitis; • In case of various disorders of the menstrual function; • In case of climacteric period; • In case of decreased libido 	Peptide complexes of vessels (A-3), brain (A-5), thymus (A-6), bioantioxidant complex "Neovitin"®, sandalwood essential oil
PC №11	For the urinary system (kidneys)	<ul style="list-style-type: none"> • In case of chronic pyelonephritis; • In case of interstitial nephritis; • In case of glomerulonephritis; • For the prevention of premature aging; • For the prevention of the development of chronic renal failure; • In case of urolithiasis disease 	Peptide complexes of vessels (A-3), thymus (A-6), bioantioxidant complex "Neovitin"®, tea tree essential oil
PC №12	For the bronchopulmonary tree	<ul style="list-style-type: none"> • In case of chronic bronchitis; • In case of lung emphysema; • In case of respiratory allergies; • In case of bronchial asthma 	Peptide complexes of vessels (A-3), cartilage (A-4), thymus (A-6), bioantioxidant complex "Neovitin"®, peppermint essential oil
PC №13	For the skin	<ul style="list-style-type: none"> • To improve the color, tone, surface and texture of the skin; • In case of various skin diseases; • For the prevention of premature aging 	Peptide complexes of vessels (A-3), cartilage (A-4), liver (A-7), bioantioxidant complex "Neovitin"®, jasmine essential oil
PC №14	For veins	<ul style="list-style-type: none"> • For the prevention of thrombosis; • In case of phlebeurysm; • In case of hemorrhoids; • In case of thrombophlebitis; • In case of trophic ulcers 	Vessel peptide complex (A-3), bioantioxidant complex "Neovitin"®, lavender essential oil
PC №15	For kidneys and bladder	<ul style="list-style-type: none"> • For the prevention of renal failure; • In case of chronic pyelonephritis, cystitis; • In case of anomalies in the development of the urinary tract; • In case of urolithiasis disease; • In case of glomerulonephritis; • In case of nephroptosis 	Peptide complexes of thymus (A-6), epiphysis (A-8), bladder (A-12), bioantioxidant complex "Neovitin"®, marjoram essential oil

Peptide complexes

PC	PURPOSE	RECOMMENDED	ACTIVE INGREDIENTS
PC №16	For the stomach and duodenum	<ul style="list-style-type: none"> • In case of peptic ulcer of the stomach and duodenum; • For the prevention of oncopathology of the gastrointestinal tract; • In case of indigestion; • In case of gastritis 	Peptide complexes of the pancreas (A-1), thymus (A-6), liver (A-7), gastric mucosa (A-10), "Neovitin"® bioantioxidant complex, orange and ylang-ylang essential oils
PC №17	For the visual analyzer	<ul style="list-style-type: none"> • In case of retinal degeneration; • At the initial stages of glaucoma and cataracts; • In case of retinal angiopathy against the background of hypertension and diabetes; • In case of atrophy of the optic nerve; • In case of a pathology of the vitreous body; • In case of spasms of the accommodation 	Peptide complexes of vessels (A-3), brain (A-5), eye tissues (A-11), bioantioxidant complex "Neovitin"®, chamomile essential oil
PC №18	For the auditory analyzer	<ul style="list-style-type: none"> • At the initial stages of sensorineural hearing loss; • In case of otitis and its consequences; • In case of damage to the tympanic membrane; • In case of sound trauma, concussion 	Peptide complexes of vessels (A-3), cartilage (A-4), brain (A-5), thymus (A-6), bioantioxidant complex "Neovitin"®, lavender essential oil
PC №19	For weather dependent and cardio patients	<ul style="list-style-type: none"> • In case of the phenomena of meteorological dependence; • In case of migraines; • In case of ischemic heart disease, heart failure; • In case of myocarditis; • In case of myocardial dystrophy 	Peptide complexes of vessels (A-3), brain (A-5), heart muscle (A-14), "Neovitin"® bioantioxidant complex, pine and peppermint essential oils

revilab anti-A.G.E. —
a new word in modern
anti-age medicine

30 capsules of 0.3 g

Revilab Anti-A.G.E. is an antiglycant that has no analogues in the world. A highly effective anti-aging complex with a powerful deglycating and antioxidant effect, guaranteeing the fastest and most intense action in the fight against protein degradation and age-related skin changes. Its active ingredients complement and enhance each other's action, which allows them to slow down the glycation process and

protect the body from advanced glycation end products (A.G.E).

Revilab Anti-A.G.E. protects the skin from the appearance of premature wrinkles, blood vessels from destruction, mitochondria from ROS leakage, and cell DNA from mutational changes. The drug helps to maintain not only radiant young and elastic skin, but also healthy internal organs, strong muscles and ligaments.

Revilab Anti-A.G.E. protects the body from any consequences of aggressive environmental influences: unbalanced nutrition, disruption of the daily routine, physical and mental overstrain, and harmful environmental impacts.

Cytogens

Peptide bioregulators based on synthesized peptides

Science does not stand still, and over time, an active amino acid sequence, that triggers the changes we need in cells, has been identified. Thus, bioregulators based on short peptides, cytogens, were developed.

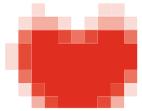

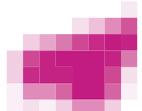

Short peptides give a faster effect, at the initial stages of peptide therapy. They start up the restoring functions of internal organs. In the future, to continue the positive dynamics in the therapy, it is recommended to start taking cyto-

maxes. Cytogens can be taken both as a preventive measure and for the correction of various conditions in combination with medical therapy. To prevent the appearance of age-related changes, dysfunctions of various systems and organs, it is recommended to take one capsule twice a day with meals for 30 days. Correction of already existing disorders in the complex therapy involves taking 2 capsules 2-3 times a day for 30 days.

Use Recommendations: 1-2 capsules 1-2 times a day with meals. The duration of admission is 10-30 days. It is advisable to repeat the course in 4-6 months.

20/60 capsules x 0.2 g

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
VESUGEN® 	Contributes to the normalization of the functional state of blood vessels	<ul style="list-style-type: none"> • In case of varicose veins; • In case of arterial hypertension; • In case of trophic ulcers; • In case of thrombophlebitis; • In case of atherosclerosis of blood vessels; • In case of angiopathy 	Peptide complex AC-2, contains the vascular peptide
CRYSTAGEN® 	Contributes to the normalization of the functional state of the immune system	<ul style="list-style-type: none"> • In case of various immunodeficiencies; • After being sick; • In case of various chronic intoxications; • During the rehabilitation after a heart attack or stroke; • After undergoing surgery; • For the prevention of cancer 	Peptide complex AC-6, contains the thymus peptide
CARTALAX® 	Contributes to the normalization of the function of cartilage and the musculoskeletal system	<ul style="list-style-type: none"> • In case of arthrosis and arthritis; • In case of rheumatism; • In case of osteochondrosis; • In case of osteoporosis; • In case of gout 	Peptide complex AC-4, contains the cartilage peptide
OVAGEN® 	Contributes to the normalization of the function of the liver and gastrointestinal tract	<ul style="list-style-type: none"> • In case of atherosclerosis and obesity; • In case of cholecystitis; • In case of cirrhosis of the liver; • In case of chronic intoxication; • In case of metabolic disorders; • In case of decreased liver function 	Peptide complex AC-3, contains the liver peptide
PINEALON® 	Contributes to the normalization of the functional activity of brain cells	<ul style="list-style-type: none"> • During the rehabilitation after a stroke; • In case of a decrease in memory and impaired concentration; • In case of Alzheimer's and Parkinson's diseases; • In case of multiple sclerosis; • In case of chronic fatigue syndrome; • In case of depression 	Peptide complex AC-5, contains the brain peptide

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
CHONLUTEN® 	Contributes to the normalization of the function of the bronchopulmonary system and the gastric mucosa	<ul style="list-style-type: none"> • In case of chronic bronchitis; • In case of emphysema; • In case of bronchial asthma; • In case of respiratory allergies 	Peptide complex AC-7, contains the bronchopulmonary tree peptide

Research and conclusions:

The action of peptide bioregulators is studied at the St. Petersburg Institute of Bioregulation and Gerontology

Accumulated experience in the use of cytomaxes and cytogens over several decades among more than 15 million consumers

+38%

Thanks to peptides, life expectancy is **increased by 30–38%**

75-95%

75-95% is the average effectiveness of drugs based on peptides

Cytomaxes

Peptide bioregulators based on natural peptides

The development of the St. Petersburg Institute of Bioregulation and Gerontology is an exclusive, highly efficient technology for the isolation of low molecular weight peptide fractions from animal organs and tissues. Bioregulators based on natural peptides help slow down premature age-related changes and normalize metabolic processes in body cells, starting their natural renewal process, reduce the risk of cancer and increase life expectancy.

The positive results of the use of cytomaxes have been proven by many years of clinical studies. These peptide bioregulators are safe to use, as they are non-medicinal products, they do not have side effects or withdrawal syndrome.

Use Recommendations:

1-2 capsules 1-2 times a day with meals. The duration of admission is 1-3 months. It is advisable to repeat the course in 1-3 months.

20/60 capsules x 0.2 g

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
BONOMARLOT®	It has a selective effect on the cells of the hematopoietic system, normalizes their metabolism, and increases their functional activity.	<ul style="list-style-type: none"> • In case of anemia of various origins; • In the complex treatment of cancer patients; • In case of inadequate and poor-quality nutrition 	Bone marrow peptide complex (A-20)
BONOTHYRK®	Has a selective effect on the cells of the parathyroid glands, normalizes their metabolism, and increases their functional activity.	<ul style="list-style-type: none"> • In case of osteoporosis; • In case of demineralization of bone tissue; • In case of urolithiasis; • In case of muscle weakness due to hyperplasia of the parathyroid glands; • In case of muscle cramps, muscle numbness, due to hypocalcemia 	Peptide complex of the parathyroid glands (A-21)
VENTFORT®	It has a selective effect on various cells of the vascular wall, normalizes metabolism in cells and regulates the functions of the vascular system.	<ul style="list-style-type: none"> • In case of arterial hypertension; • In case of atherosclerosis of the vessels of the lower extremities; • In case of obliterating endarteritis; • In case of atherosclerosis of cerebral vessels and disorders of cerebral circulation; • In case of ischemic heart disease; • In case of varicose veins; • In case of hemorrhoids; • In case of angiopathy of various origins; • After a myocardial infarction or stroke 	Peptide complex of vessels (A-3)

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
PIELOTAX®	It has a selective effect on the cells of kidney tissues, and normalizes their metabolism.	<ul style="list-style-type: none"> • In case of urolithiasis; • In case of nephroptosis; • In case of anomalies of the urinary tract; • In case of chronic pyelonephritis, cystitis, glomerulonephritis; • In case of renal insufficiency; • In case of nephropathy of various origins, including diabetic nephropathy 	Kidney peptide complex (A-9)
SIGUMIR®	It has a selective effect on the cells of cartilage and bone tissue, normalizes metabolism in cells and regulates the functions of the joints and spine.	<ul style="list-style-type: none"> • In case of arthrosis and arthritis; • In case of rheumatism; • In case of osteochondrosis; • In case of osteoporosis; • In case of gout 	Cartilage peptide complex (A-4)
STAMAKORT®	Has a selective effect on the cells of the gastric mucosa, and normalizes their metabolism.	<ul style="list-style-type: none"> • In case of gastritis, gastroduodenitis; • In case of peptic ulcer of the stomach and duodenum; • After undergoing surgery on the stomach, including the removal of tumors; • In case of chronic pancreatitis; • In case of digestive disorders; • In case of inadequate and poor-quality nutrition; • When following diets aimed at weight loss 	Peptide complex of the gastric mucosa (A-10)
SUPREFORT®	It has a selective effect on pancreatic cells, normalizes their metabolism and regulates their functions.	<ul style="list-style-type: none"> • In case of various disorders of the function of the pancreas; • To normalize the process of digestion; • In case of chronic pancreatitis; • In case of the secretory insufficiency of the pancreas; • For the normalization of lipid and carbohydrate metabolism; • In case of diabetes mellitus of the 1st and 2nd types; • For the prevention of diabetes mellitus in people over the age of 50. • In case of inadequate and poor-quality nutrition; • When using diets aimed at weight loss 	Peptide complex of the pancreas (A-1)

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
SVETINORM®	It has a selective effect on liver cells, normalizes metabolism in cells and regulates its functions.	<ul style="list-style-type: none"> • In case of metabolic disorders; • In case of a decrease in liver function; • In case of chronic hepatitis of various etiologies; • In case of chronic intoxication; • In case of skin diseases; • For the normalization of lipid metabolism; • In case of atherosclerosis and obesity; • In case of inadequate and poor-quality nutrition; • When using diets aimed at weight loss. 	Liver peptide complex (A-7)
TAXOREST®	It has a selective effect on the cells of the bronchial mucosa, normalizes their metabolism, and increases their functional activity.	<ul style="list-style-type: none"> • In case of chronic bronchitis and smoker's bronchitis; • In case of bronchial asthma; • In case of chronic obstructive pulmonary disease; • In case of chronic heart failure; • After diseases of the bronchi and lungs of various origins 	Peptide complex of the bronchial mucosa (A-19)
TESTOLUTEN®	It has a selective effect on the cells of the male reproductive system, increases functional activity and enhances sperm motility.	<ul style="list-style-type: none"> • To increase the functional activity of the male body; • For the normalization of the male hormonal status; • To enhance libido; • To enhance erectile function; • To normalize sperm motility 	Peptide complex of testicles (A-13)
THYREOGEN®	It has a selective effect on the cells of the thyroid gland, normalizes metabolism in cells and regulates its functions.	<ul style="list-style-type: none"> • In case of metabolic disorders; • For the prevention of thyroid diseases; • In case of hypo- and hyperthyroidism; • In case of autoimmune thyroiditis 	Thyroid peptide complex (A-2)
CERLUTEN®	It has a selective effect on the cells of the nervous tissue and brain, normalizes metabolism in cells and regulates their functions.	<ul style="list-style-type: none"> • For the normalization of brain activity against the background of atherosclerosis; • During rehabilitation after a stroke and traumatic brain injury; • In case of a decrease in memory, impaired concentration and multiple sclerosis; • In case of Alzheimer's and Parkinson's diseases; • In case of chronic fatigue syndrome and depression; • In case of neuralgia and neuritis; • In case of emotional instability, especially in the elderly 	Peptide complex of the brain (A-5)

TITLE	PURPOSE	RECOMMENDED	ACTIVE INGREDIENT
CHELOHART®	Has a selective effect on myocardial cells, normalizes metabolism in cardiomyocytes.	<ul style="list-style-type: none"> • In case of ischemic heart disease; • In case of hypertension; • In case of myocarditis; • In case of postinfarction atherosclerosis; • In case of myocardial dystrophy of various origins; • In case of heart failure; • In case of increased physical activity and malnutrition 	Peptide complex of the heart muscle (A-14)
CHITOMUR®	It has a selective effect on the cells of the bladder wall, normalizes metabolism in the cells of the bladder wall, and stimulates the muscle tone of the detrusor and sphincter.	<ul style="list-style-type: none"> • In case of chronic cystitis; • In case of urinary disorders due to diseases of the prostate; • In case of urinary disorders due to menopause; • In case of spinal bladder; • In case of urinary incontinence due to prolapse pelvic organs in women 	Bladder peptide complex (A-12)
ENDOLUTEN®	It has a selective effect on the cells of the neuroendocrine system, normalizes the metabolism in the cells of the pineal gland and the secretion of melatonin, regulates hormonal metabolism, has a regulatory effect on the pineal gland in particular and on the whole body as a whole.	<ul style="list-style-type: none"> • To normalize the function of the neuroendocrine system; • for the normalization of all cyclic processes in the body; • To synchronize the biological clock; • To normalize the functioning of the reproductive system and increase fertility; • To delay and smooth the manifestations of menopause; • For the prevention of cancer; • To increase immunity; • To prevent premature aging and increase life expectancy 	Peptide complex of the pineal gland (A-8)

ANTISEPTIC HYGIENIC LOTION WITH PEPTIDES

Antiseptic spray without alcohol is fast and effective in action. Designed for hand treatment. Cleans and disinfects the skin, preventing the transmission of pathogenic microorganisms.

Due to the peptide of the T-link of the immune system, "Ultrasept" activates local immunity, due to the antiseptic (Myristamidopropalkonium Chloride) — provides an antimicrobial effect against gram-positive, gram-negative, aerobic and anaerobic bacteria.

Destroys germs

Cytogens lingual

Bioregulators based on synthesized peptides in the sublingual form of application

Peptide drugs of the Cytogen class in sublingual form are classics in a new form. Sublingual administration has a number of advantages: there is no loss of time, and no partial hydrolysis of drugs, there is an instant capture of the drug by the

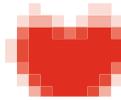

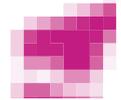

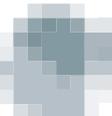

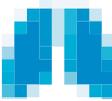

sublingual venous network. In sublingual mono-peptides, the daily dose is twice reduced compared to encapsulated monodrugs of the Cytogen class; the dose of cytogens in sublingual form is 100 µg per 1 ml. In addition, the new generation of drugs has a significant plus – the ability to more accurately select an individual dose.

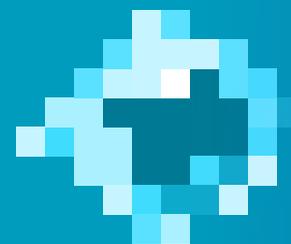

Use Recommendations: Put 5-6 drops under the tongue 10-15 minutes before meals, 3-4 times a day. Duration of admission – 1 month. It is recommended to repeat the course of treatment after 3-6 months.

Visulingual®

10 ml

VISULINGUAL® LINGUAL

We present to your attention a complex sublingual drug based on synthesized peptides, developed by the St. Petersburg Institute of Bioregulation and Gerontology at the request of ophthalmologists.

Visulingual® contains 4 peptide complexes, each of which consists of 3 amino acids: AC-2 peptide complex normalizes the functional state of blood vessels; peptide complex AC-5 – the functional state of brain cells; peptide complex AC-6 – the functional state of the cells of the immune system; peptide complex AC-7 – the functional state of retinal cells.

AC-7 shows biological activity in relation to several tissues: bronchial mucosa, gastric mucosa and retina. In this regard, in this drug, AC-7 exhibits a retinoprotective effect.

It is recommended for the complex restoration of the functions of the organ of vision after diseases of various origins, including degenerative-dystrophic diseases. It is also effective in helping the treatment of pathological conditions that lead to visual impairment, when exposed to extreme environmental factors, including professional ones, malnutrition, as well as during aging.

Active ingredients: vascular peptide (AC-2), cerebral cortex peptide (AC-5), thymus peptide (AC-6), bronchopulmonary tree peptide (AC-7).

Volustom® is a complex based on dietary fiber. Creates a favorable environment for symbiotic microflora, prevents the development of inflammatory diseases of the gastrointestinal tract and normalizes its work.

Active Ingredients: Whole Apple Powder, Chicory Inulin, Bamboo Fiber, Oat Fiber, Apple Fiber, Chicory Oligofructose, Psyllium (Psyllium Husk), Flax Seed, Cinnamon Powder, Apple Pectin, Turmeric, Ginger Powder, Stevioside Natural Sweetener. Net weight: 150 g

Instructions: Dilute 1 teaspoon (5 g) of the concentrate in 100-150 ml of room-temperature water and drink. Drink additional water. The use of fibers involves increasing the amount of fluids consumed during the day. The complex should be diluted directly before use. Take 1-2 times a day.

Therapeutic and prophylactic drugs

For health, beauty and active life

At present, it has become possible to significantly improve the quality of life and slow down the aging process of the body thanks to therapeutic and prophylactic drugs. The line of modern non-peptide parapharmaceuticals was created taking into account the latest scientific developments in the field of anti-aging medicine as an addition to the basic

revitalization program based on peptide bioregulators.

The complex use of the presented products contributes to the normalization of metabolic processes, the restoration of lost functions of organs and body systems without destructive side effects, creates a reliable basis for preserving youth, beauty and health.

In combination with peptide bioregulators, this class of parapharmaceuticals reduces the risk of malignant neoplasms and age-related diseases.

Mamiton®

Oncoprotector for the female reproductive system

A non-peptide bioregulator that restores the functioning of the female reproductive system, increases the immune status of the body, has an antioxidant, antimitotic, estrogen-blocking effect, especially at the risk of developing oncopathology associated with hormonal disorders. Resveratrol, which is part of the drug, prevents the development of malignant neoplasms and reduces the risk of osteoporosis, stimulates collagen synthesis, improving the condition of the skin and hair.

Active ingredients: extracts: horsetail, nettle, kelp thallus, motherwort, rose hips, knotweed, mint, hops, walnuts; resveratrol, vitamins A and E.

Directions for use: 1 capsule 1-2 times daily with meals. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

60 capsules of 0.39 g

Mamiton® gel-cream

Prevention of mastopathy and neoplasms

Gel-cream for the chest and décolleté Mamiton® is a novelty that has absorbed the best of the plant world and is enhanced with the latest biotechnologies.

Improves microcirculation in tissues, has anti-inflammatory properties, while giving firmness and elasticity to the delicate skin of the chest and décolleté. Mamiton® gel-cream helps to restore metabolic processes in the glandular tissue, prevents the formation of fibrocystic changes, has a lifting effect and helps to maintain the shape of the mammary glands.

Recommended in combination with the Mamiton® bioregulator for the prevention of mastopathy and neoplasms.

Active ingredients: peptide complexes: AA-3 (B-link of the immune system), AA-9 (cartilage); oils: grape seed, avocado, shea; extracts: horsetail, gotu kola, hops, CO2 rosemary extract; bioflavolipid complex "Activitin"®, betaine, panthenol, soluble collagen, hydrolyzed elastin, vitamin complex PP, B5, C, E, B6; squalane, aloe vera gel, allantoin, orange essential oil.

Instructions: Apply to clean skin with light massaging movements.

50 ml

CONTAINS PEPTIDES

Imusil®

immunoprotector

Natural immunorestorer based on live lactobacteria and bifidobacteria and fragments of their cell wall in combination with echinacea and ascorbic acid. Activates all parts of the immune defense. Reduces the risk of malignant neoplasms.

Recommended in cases of dysbacteriosis, frequent colds, allergies, chronic diseases of: gastrointestinal tract, lungs, heart, liver, nervous system; in case of regular exposure to harmful substances at work, taking antibiotics, obesity, high physical activity, and for the prevention of cancer.

Active ingredients: probiotic bifido- and lactobacillus ferment, echinacea extract, ascorbic acid.

Instructions: Adults: 1 capsule 2 times a day during meals for 2-3 weeks. The course of treatment can be repeated after 2-3 weeks.

20 capsules of 0.31 g

Zinsil-T®

source of zinc

A complex drug based on zinc, glycine and pyridoxine. Effectively prevents accelerated aging processes, corrects the work of many enzymes and hormones, and restores impaired immune and antioxidant status. It is a proven means of preventing cancer.

It is recommended to support immunity and increase the antioxidant status after strokes and traumatic brain injuries, stress and insomnia, allergies and skin diseases, disorders of carbohydrate and lipid metabolism, diabetes mellitus, atherosclerosis and vegetative dystonia, hypertension and for the prevention of premature aging.

Active ingredients: glycine, zinc citrate, vitamin B₆

Instructions: Adults: 1 tablet 2 times a day, which you chew during meals. The duration of admission is 1 month. You can repeat the course of treatment if necessary.

20 tablets of 1.0 g

Calsil-T®

source of calcium and magnesium

A complex drug for prolonging active longevity based on calcium, magnesium, as well as vitamins A, D and E.

Recommended for the prevention of osteoporosis and oncopathology, in case of cerebral insufficiency, hypertension and coronary artery disease, bleeding disorders, osteoporosis, depression and insomnia, memory impairment, dizziness and headache, tinnitus, rheumatoid arthritis, osteochondrosis; in case of mental and physical stress, fractures, diseases of the organs of vision, hepatitis, skin diseases, diabetes, menopause, for the prevention of premature aging.

Active ingredients: calcium citrate, calcium carbonate, magnesium citrate, magnesium carbonate, vitamins A, D and E.

Instructions: Adults: 1 tablet 2 times a day with meals. The duration of admission is 1 month. You can repeat the course of treatment if necessary.

20 tablets of 1.0 g

Olecap®

angiorestorator

A drug based on polyunsaturated fatty acids of the omega-3, omega-6 class, tocopherols and tocotrienols. Effectively inhibits the growth of atherosclerotic plaques, reduces the level of cholesterol in the blood. It has strong antioxidant properties.

Recommended for disorders of fat metabolism, high blood cholesterol, atherosclerosis, hypertension and ischemic disease, for the prevention of heart attacks and strokes, diabetes, allergies and after chemoradiotherapy.

Active ingredients: cold water salmon oil, linseed oil, vitamins A and E.

Instructions: 1 capsule 2-3 times a day with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment if necessary.

30 capsules of 840 mg

Regenart®

joint and liver protection

A complex product to support the functioning of the joints and liver. An important task of the drug is to restore the functional activity of the liver. The improvement of the liver function enhances the regenerative capacity of cartilage tissue and articular surfaces, improving joint mobility. Recommended in case of arthrosis, arthritis, osteochondrosis, and chronic diseases of the liver and biliary tract. Prevents the development of cirrhosis of the liver.

Active ingredients: dandelion root extract, chondroitin sulfate, artichoke extract, dihydroquercetin.

Instructions: 1 capsule 2 times a day with meals. The duration of admission is 1 month. You can repeat the course of treatment if necessary.

20 capsules of 0.30 g

Ardiliv®

liver recovery

Stimulates the regeneration of liver cells, activates detoxification processes and has an antioxidant effect. It also enhances the regeneration of liver cells after viral and toxic damage. It prevents the development of liver cirrhosis, is able to normalize its function and achieve stable positive results in patients with various forms of hepatitis. It is recommended in case of chronic intoxication, viral, toxic, alcoholic and medicinal hepatitis, a decrease in the detoxification and protein-forming functions of the liver, fatty hepatosis and cirrhosis, to prevent the development of liver adenocarcinoma.

Active ingredients: extracts: red grape leaf, strawberry, artichoke; dihydroquercetin, resveratrol.

Instructions: 1-2 capsules 2 times a day with meals. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

30 capsules of 0.30 g

Renefort®

kidney protection

A multi-component drug for maintaining the optimal functioning of the urinary system. It has anti-inflammatory, antioxidant, moderate antispasmodic and diuretic effects. Increases the solubility of urinary stones, consisting of salts of uric and oxalic acid. Slows down the progression of kidney failure. It is recommended in case of chronic pyelonephritis and glomerulonephritis, cystitis, nephroptosis, urolithiasis, abnormal development of the urinary tract and chronic renal failure.

Active ingredients: magnesium oxide, lingonberry leaf, horsetail herb, rosehip extract, rosemary extract, hesperidin, vitamin C, superoxide dismutase, hibiscus extract, vitamin E, beta-carotene, dihydroquercetin, coenzyme Q10.

Instructions: 1 capsule 2 times a day with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment if necessary.

20 capsules of 0.41 g

Gelmigon®

antiparasitic drug

Non-peptide bioregulator based on plant components with a wide range of preventive antiparasitic effects. The efficiency of the drug is seen through the appearance of a concentration of substances intolerable to parasites in the body. These substances are safe for humans. Active ingredients enhance the body's resistance and are completely safe for health. It is recommended for the prevention of parasitic invasions of various etiologies, for allergic reactions caused by helminthiases, chronic fatigue syndrome, for the prevention of disorders of the gastrointestinal tract due to helminthic invasion.

Active ingredients: Emblica fruit extract (amla), plantain leaves, horsetail herb, cloves, cinnamon, garlic, ginger root, buckthorn bark, anise seeds, extracts: licorice root, yarrow herb, walnut leaves, artichoke fruit, fenugreek seeds.

Instructions: 1 capsule 2-3 times a day with meals. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

30 capsules of 0.40 g

Panaxod®

protection of the stomach and duodenum

A drug based on the enzyme superoxide dismutase (SOD), which improves the functional state and accelerates recovery in standard therapy for gastric and duodenal ulcers — quickly relieves pain, reduces the scarring of ulcerative defects, significantly reduces the severity of endoscopic and histological manifestations of the inflammatory reaction in the periulcrosal mucosa.

Recommended in case of various diseases of the gastrointestinal tract, accompanied by an inflammatory syndrome. It is used in standard therapy for peptic ulcer of the stomach and duodenum, gastritis, and for the complete destruction of Helicobacter pylori infection.

Active ingredients: superoxide dismutase, ginseng biomass, rutin, vitamin PP.

Instructions: 1 capsule 3-4 times a day, morning and afternoon, with meals. The duration of the course is 2-3 weeks.

60 capsules of 0.17 g

Trezvon®

mitigates the symptoms of intoxication

The non-peptide bioregulator eliminates intoxication of various origins, including alcohol. It has an effective anti-inflammatory, hypolipidemic, hepatoprotective and choleric effect. It has antitumor, antiviral and bactericidal activity. The components have a neuroprotective, anti-stress, sedative effect, improve metabolic processes in brain tissues, restore sleep, and increase the resistance of neurons to intoxication.

It is recommended for intoxications of various origins, including alcohol, during the hangover syndrome, to support liver function and normalize metabolism.

Active ingredients: birch leaf extract, glycine, lemon balm herb, cinnamon, choline bitartrate, extracts: burdock root, artichoke fruit, thyme herb; bay leaf, dihydroquercetin, vitamin B₆

Instructions: 1 tablet 1-2 times per day with meals. If necessary, the intake can be increased to 4 tablets per day.

10 tablets of 0.71 g

Revimite®

source of vitamins and minerals

Nutraceutical, replenishing the deficiency of trace elements and other useful substances. Compensates for the lack of B vitamins and iron (Fe). It has an immunomodulatory and antioxidant effect.

It is recommended to support the immune system, in case of a decrease in antioxidant status, metabolic disorders, atherosclerosis, diabetes mellitus, anemia of various origins, when dieting or fasting, as part of complex programs for body weight correction, in case of increased physical activity.

Active ingredients: concentrated pomegranate juice, soy lecithin, pectin, oat herb extract, echinacea purpurea extract, extracts: green tea, grape seed, soy isoflavones, yeast; dried ginger, Brazilian ginseng, iron pyrophosphate, cloves, vitamins B₁, B₃, B₆.

Instructions: 1 teaspoon (10 grams) on its own or with any product. Can be spread on a slice of bread.

100 g

Adestab®

vascular and heart support

Soft antihypertensive and angiotropic drug for the prevention of heart attacks and strokes. Improves metabolism in the vascular wall and maintains its healthy integrity. Its course use allows you to stabilize blood pressure and significantly reduce the risk of developing vascular complications in the body.

It is recommended to stabilize blood pressure, prevent thrombosis, to reduce hot flashes during menopause, to improve myocardial trophism, and to reduce weather dependence.

Active ingredients: potassium chloride, magnesium citrate, chokeberry fruit, lemon balm herb, marigold flowers, hop cones, fennel seeds, extracts: hawthorn fruit, horsetail herb.

Instructions: 2 tablets 2 times a day with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

60 tablets of 1.0 g

Actiman®

support for the male body

A complex drug that positively affects the functioning of the male genitourinary system. Improves metabolic processes in the prostate gland and testicles, normalizes the maturation of spermatozoa and restores their mobility in the ejaculate. Reduces congestion and inflammation in the pelvic organs. Improves blood flow to the cavernous bodies of the penis, restores potency. Slows down the growth of prostate adenoma.

Recommended in case of erectile dysfunction and chronic congestive prostatitis, prostate adenoma, decreased libido, premature ejaculation and decreased quality of the ejaculate.

Active ingredients: L-arginine, L-carnitine, acetyl-L-carnitine, extracts: sabal palm (saw palmetto), prickly pear cactus flowers, pumpkin seeds, pygeum bark, muira puama, epimedium.

Instructions: 1 capsule 2 times a day with meals. The duration of admission is one month. It is possible to repeat the course of treatment 3-4 times a year.

30 capsules of 0.39 g

Complex 3D®

antioxidant and detoxifier

A complex product based on detoxifiers and antioxidants. Due to the presence of glutathione, SOD and catalase, dihydroquercetin in the composition of the tripeptide, the drug is able to solve several problems at once: slow down aging at the cellular level, prevent intoxication caused by the glycation process, and have a regenerating, anti-inflammatory, immuno-, angio- and hepatoprotective effects.

"Complex 3D" reduces the level of chronic inflammation in the connective tissue and vascular wall, which is especially important in atherosclerosis, and phlebitis.

It is recommended for use in case of varicose veins, for the prevention of atherosclerosis and hypertension, in case of liver dysfunction, chronic intoxication, chronic inflammation syndrome (damage to connective tissue elements in the joints, skin, blood vessels), in case of oxidative stress, diseases of the cardiovascular system, for the prevention of accelerated aging.

Active Ingredients: Selenium enriched brewer's yeast, L-cysteine, dihydroquercetin, catalase, vitamin E, barley sprout extract (contains superoxide dismutase), vitamin A, glutathione.

Instructions: Adults take 1 capsule a day with food. Duration of admission — 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

30 capsules of 0.4 g

Femalin®

female body support

A drug that normalizes the functioning of the female reproductive system. Helps to solve hormonal, sexual and psychosomatic problems, and favorably affects the hormonal status of the female body.

It is recommended in case of menstrual cycle disorders and painful menstruation, to increase the sensitivity of the genital tract, anorgasmia, ovarian dysfunction, menopause, decreased libido, neuroendocrine balance disorders, sleep disorders, neurosis, depression, to normalize blood pressure and heart function, correct weight, and to level blood sugar and mineral metabolism in menopause.

Active ingredients: L-arginine, dioscorea extract, muira puama extract, yohimbe bark extract and resveratrol.

Instructions: 1 capsule daily with food. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

30 capsules of 0.43 g

Proteston®

men's health protection

Multicomponent drug with peptides for the normalization of the functions of the male reproductive system.

The combination of a dipeptide that stimulates the functions of the male reproductive system and active ingredients — extracts of reindeer antlers, hemolen, pygeum bark, zinc and selenium contributes to the prevention of aging and allows you to effectively correct the work of the male genitourinary system.

It is recommended in case of erectile dysfunction, a moderate increase in testosterone levels, prostate adenoma, chronic congestive prostatitis, premature ejaculation, decreased libido and impaired reproductive function, to maintain the immune system, and to increase mental and physical activity.

Active ingredients: peptide complex of the male reproductive system (AA-21), L-arginine, brewer's yeast enriched with selenium, pygeum bark extract, hemolen, pantel, zinc, epimedium extract.

Instructions: 1 capsule daily with food. Duration of admission — 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

30 capsules of 0.3 g

Indosine®

cancer prevention

A highly effective drug that reduces the risk of developing an oncological process. Contains a complex of coenzyme components, membrane stabilizers, immunomodulators and antioxidants. It restores the body's own antioxidant status, supports the immune system, removes toxins from cells, and protects the body from the development of cancer.

It is recommended in case of an increased risk of oncological diseases, the presence of precancerous diseases, in the complex treatment of oncopathologies, in case of recurrent neoplasms, chemoradiotherapy, antibiotic therapy, rehabilitation after surgical interventions, and allergies.

Active ingredients: milky white iris extract, catalase, superoxide dismutase, coenzyme Q10, broccoli extract, indole-3 carbinol.

Instructions: 1 tablet 1 time a day with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment throughout the year if necessary. Do not break or crush tablets before use.

30 tablets of 0.63 g

Complex 3R®

body's antioxidant defense

The multi-component bioregulator includes the three most powerful antioxidants, a membrane stabilizer and a geroprotector. It is a geroprotector, which solves many problems due to the presence of such powerful antioxidants as dihydroquercetin, resveratrol and coenzyme Q10 in its structure.

It is recommended for use in case of immunodeficiencies of various origins, frequent viral diseases, lipid metabolism disorders, as an antioxidant, for the prevention of oncopathologies and diseases of the cardiovascular system.

Active ingredients: antioxidant complex: coenzyme Q10, resveratrol and dihydroquercetin.

Instructions: 1 tablet 1-2 times a day with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

30 tablets of 0.25 g

Chondromix®

chondroprotector

A complex drug that affects the process of cartilage tissue restoration. Prevents the development of degenerative-dystrophic changes in the joints and spine, increases the synthesis of hyaluronic acid — the main component of the synovial fluid, which ensures the sliding of the joint in the joint bag; normalizes the composition of the joint lubrication. It helps to reduce pain and inflammation in the joints, and also relieves the crunch and stiffness of the joints.

Recommended in case of osteoarthritis, arthritis, bursitis, rheumatism, spinal osteochondrosis and gout.

Active ingredients: chondroitin sulfate, glucosamine, methylsulfonylmethane, grape seed extract, catalase, Boswellia serrata extract, superoxide dismutase.

Instructions: 1 tablet 2 times daily with meals. The duration of admission is 4-6 weeks. You can repeat the course of treatment throughout the year if necessary. Do not break or crush the tablets before use.

30 tablets of 0.41 g

Chondromix®, cream-balm

anti-inflammatory, pain reliever
for joints and muscles

Cream-balm based on cartilage and vascular peptides effectively eliminates pain, improves local blood circulation, nutrition of the joint and trophism of periarticular tissues. The penetration of active components directly to the inflamed area relieves spasms of the periarticular muscles that activate pain receptors. Having a relaxing effect, it restores blood circulation, relieves swelling and restores mobility and lightness to the joints.

Recommended in case of arthritis, arthrosis, neuralgia, pain syndrome, inflammation and swelling of the joints and muscles, the consequences of injuries.

Active ingredients: peptide complexes: vascular wall (AA-7), cartilage (AA-9), extracts: cinquefoil, boswelli, hot pepper; camphor, menthol, essential oils of juniper and rosemary.

Instructions: Apply to clean skin of problem areas 2-3 times a day with light circular movements until completely absorbed.

50 ml

Amvix®

source of extra energy

The composition of instant tablets includes vitamins and amino acids necessary to normalize the functioning of the nervous system and restore the activity of metabolic processes. The components of the drug normalize blood pressure and blood sugar levels, fight fatigue, increase brain and physical activity, and have an antitoxic effect.

It is recommended in case of increased physical and mental stress, stressful situations, after illnesses, during periods of business trips and travel (especially those associated with changing time zones), during diets.

Active ingredients: Eleutherococcus root extract, taurine, betaalanine, glutamic acid, carnitine, aspartic acid, arginine, leucine, isoleucine, valine, vitamins: A, C, E, B₆, B₉, PP

Instructions: Take one tablet in the morning, after dissolving it in a glass of water at room temperature.

10 fast-dissolving tablets of 2.5 g

Felicita®

natural antidepressant

A complex natural bioregulator that has a beneficial effect on the functioning of the cardiovascular and nervous systems of the body. Its action is due to B vitamins, folic acid and calcium pantothenate, in its structure, which play an important role in maintaining the normal functioning of the nervous system. The effect of the drug on mental activity is to relieve strong psycho-emotional stress caused by frequent stressful situations.

Recommended in case of strong psycho-emotional stress, neurosis, apathy, depression and chronic fatigue, and increased physical and mental stress.

Active ingredients: magnesium carbonate, vitamins: C, B₁, B₆, B₁₂, PP, calcium pantothenate, folic acid, biotin; clove, basil, lecithin, cinnamon, tyrosine, arginine, phenylalanine, 5-hydroxytryptophan.

Instructions: 1 tablet daily with meals. Duration of admission — 4-6 weeks. You can repeat the course of treatment throughout the year if necessary (preferably in fall or spring).

30 tablets of 0.71 g

Previn®

capillary protection

The drug is based on hesperidin, nicotinamide and plant components. It has antioxidant and angioprotective effects. It relieves spasms of small arterioles, improves microcirculation, strengthens the walls of capillaries, restores the rheological properties of blood, prevents thrombosis and the development of strokes and heart attacks.

Recommended as an additional source of hesperidin and nicotinamide, to relieve spasms of small vessels, normalize the rheological properties of blood, prevent the development of atherosclerosis, strokes and heart attacks, lower blood cholesterol levels, strengthen the walls of blood vessels and restore capillary blood flow

Active ingredients: L-arginine, hesperidin, choline bitartrate, green tea extract, vitamin PP.

Instructions: 1 tablet daily with meals. Duration of admission — 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

30 tablets of 0.5 g

Temero Genero®

support for the neuroendocrine system

A complex of two drugs to improve the functioning of the neuroendocrine and immune systems.

Temero is a modulator of the pineal gland and the brain, it has a beneficial effect on metabolism. Designed for taking in the morning — the time of physiological activity of the pineal gland.

Genero is a modulator of the immune system and regenerative processes. Designed for taking in the evening.

Recommended for strengthening the immune system, in case of neuroendocrine disorders, in the complex correction of neuroses and depression, to increase vitality, stimulate regeneration processes, in case of sleep disorders, in the complex correction of menopausal disorders, in programs for the treatment of alcohol and drug addictions, for achieving active longevity.

Temero active ingredients: glycine, glutamic acid, choline bitartrate, aspartic acid, calcium citrate, magnesium citrate, alanine, zinc citrate, 5-hydroxytryptophan, folic acid.

Genero active ingredients: calcium citrate, magnesium citrate, glutamic acid, aspartic acid, proline, choline bitartrate, zinc citrate, lysine, folic acid.

Instructions: 1 tablet of Temero in the morning with meals and 1 tablet of Genero in the evening. The duration of admission is 4-6 weeks. You can repeat the course of treatment throughout the year if necessary.

30 tablets of 0.55 g; Genero — 30 tablets of 0.65 g

Alvenorm Forte®

support of the bronchopulmonary system

Complex peptide bioregulator for the normalization of the respiratory system. The combination of ultrashort peptides and a complex of medicinal extracts provides an effective result in the prevention and correction of diseases of the bronchopulmonary tree.

Does not cause irritation of the mucous membranes, has a mucolytic, antiseptic, antispasmodic and immunoactivating effects.

Recommended in case of ARVI and acute respiratory infections, acute and chronic bronchitis, chronic obstructive pulmonary disease, pneumonia and bronchial asthma as part of a complex therapy.

Active ingredients: peptide complexes: peptide of the B-link of the immune system (AA-3), peptide of the bronchi (AA-14), peptide of the lungs and stomach wall (AA-15), decoction of cetraria, red grape juice concentrate, extracts: plantain, flowers calendula, nettle, lingonberry leaf, licorice root, thyme, eucalyptus

Retisil®

reliable vision aid

Supports the functioning of the organs of vision at an optimal physiological level — contributes to a noticeable improvement in blood supply to the retina, as well as relieving eye fatigue and improving vision, especially at dusk and at night.

Recommended for the normalization of metabolism in the eye tissues, in case of diabetic and atherosclerotic angiopathy, as well as retinal degeneration.

Active ingredients: concentrated cranberry and blueberry juices, natural plant extracts: rosehip, grape seed, nettle, lemongrass, green tea, licorice; zinc lactate.

Canacor®

capillary protection

A complex drug that supports the work of the heart and the state of blood vessels at an optimal physiological level. It activates the processes of tissue respiration in myocardial cells and increases their resistance to hypoxia.

Contributes to the normalization of the rheological properties of blood. Increases the elasticity of arteries and capillaries. Reduces the pressure on the myocardium. Relieves excess tension and spasms of the arterial smooth muscle cells.

It is recommended in case of atherosclerosis and coronary heart disease, increased blood clotting, pathological fragility of blood vessels, arterial hypertension, myocarditis of various origins, myocardial dystrophy, for the prevention of heart attacks and strokes.

Active ingredients: apple juice concentrate, taurine, vitamin PP, arginine, natural plant extracts: hawthorn, white willow bark, nettle; DHQ (dihydroquercetin).

Digemax®

aid to the gastrointestinal tract

Normalizes the work of the gastrointestinal tract, has an enveloping effect on the gastric mucosa, thereby creating a protective barrier that prevents the action of aggressive components and pathogenic flora.

Stimulates the growth and activity of beneficial intestinal microflora, improves its peristalsis, has antispasmodic, anti-inflammatory, hepatoprotective and mild choleric effects.

Recommended in case of a peptic ulcer of the stomach and duodenum, acute and chronic gastritis, colitis, diarrhea, enteritis, heartburn and increased flatulence, bile stasis, and decreased appetite.

Active ingredients: concentrated apple and chokeberry juices, lactulose, natural plant extracts: chamomile, aloe vera, mint, yarrow, licorice, St. John's wort, calendula, marshmallow, and fennel.

Pangluin®

helping the body with diabetes

It is used to help maintain diabetes mellitus type 1 and 2. Helps to increase the efficiency and resistance to stress of β -cells of the pancreas. Prevents the development of vascular lesions characteristic of diabetes. It has a moderate hypoglycemic effect.

It is recommended in case of disorders of lipid and carbohydrate metabolism, diabetes mellitus type 1 and 2, impaired glucose tolerance, prevention of diabetic angiopathy of leg vessels, blood clotting disorders and capillary fragility.

Active ingredients: concentrated rosehip juice, natural plant extracts: gotu kola and wolfberry, wild rose, blueberry, yarrow, licorice, St. John's wort, calendula, nettle, raspberry leaf.

 120 ml

Instructions: 1 teaspoon (5 ml) 2 times a day, on its own or as an addition to other beverages. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

Rinolax®

cleansing and regenerating nasal balms

In case of rhinitis, one of the first symptoms of respiratory infections, Peptides developed a complex of nasal balms **Rinolax®: "Cleansing" and "Regenerating"**. These drugs stimulate recovery processes, activate local immunity, help relieve symptoms of congestion and dryness in the nasal passages and sinuses. To achieve the best effect, the balms must be applied sequentially: first **"Cleansing"**, then **"Regenerating"**.

The **"Cleansing" balm**. By washing your nose with it, you automatically cleanse the mucous membrane of all contaminants (including bacterial ones) and create an antiseptic environment for a while. Then you must treat the nasal mucosa with a regenerating balm. It contains natural and vegetable essential oils with a long bactericidal effect. The oil base allows the balm to remain on the nasal mucosa for 2-3 hours and protect it from bacterial contamination.

The **"Cleansing" balm** helps to remove infectious agents from the nasal cavity, relieve swelling and dryness of the mucosa, and restore nasal breathing.

Recommended in case of increased dryness of the nasal mucosa, work in dusty rooms, allergic rhinitis, for hygiene of the nasal cavity, for the prevention of diseases of the upper respiratory tract.

The **"Regenerating" balm** contains peptides in the link of the immune system and blood vessels. It has a powerful regenerating, antibacterial, anti-inflammatory and antiviral effect. Peptides activate local immunity and accelerate the regeneration of the nasopharyngeal mucosa, which is especially important in atrophic rhinitis.

It is recommended in case of inflammatory diseases of the nose and nasopharynx, chronic atrophic rhinitis, sinusitis and sinusitis, for post-operative rehabilitation after surgical interventions on the paranasal sinuses, vasomotor rhinitis, for the prevention of bronchopulmonary pathology

Active ingredients of the Cleansing balm: purified water, panthenol, Dead Sea salt, hyaluronic acid, myristamidopropalkonium chloride.

Active ingredients of the "Regenerating" balm: peptide complexes: B-link of the immune system (AA-3), vascular wall (AA-7), oils: almond, peach, essential oils: mint, eucalyptus, mandarin, tea tree, pine, Kalanchoe extract, thymol, butylhydroxytoluene (BHT).

Use Recommendations: 5-6 sprays of the Cleansing Balm, then 1-2 drops of the Regenerating Balm. Apply 2 to 4 times a day as needed for a course of at least 10 days.

50 ml // 10ml

Pinalex®

eye peptide bioregulator

Peptide bioregulator for the stimulation of the recovery processes of eye tissues in diseases and injuries of the retina and cornea.

Peptide complexes of the immune system (B-link), the vascular wall and the retina of the eye improve metabolism in the tissues of the eye, starting the recovery process at the cellular level.

The composition of the bioregulator includes panthenol, which promotes active regeneration of damaged tissues, while having a moderate anti-inflammatory effect. When exposed to the conjunctiva, it promotes the regeneration of corneal tissues during erosion or inflammation processes.

One of the product's main components is low molecular weight hyaluronic acid, which, integrating into tissue cells, participates in its restoration. Hyaluronic acid also showed excellent results in the field of ophthalmology, well moisturizing the surface of the cornea and accelerating the healing process of damaged tissues.

Succinic acid, which is part of Pinalex® balm, is obtained as a result of processing natural amber. It promotes energy production and has a non-specific therapeutic effect in a number of diseases of various etiologies. It has antiviral and antihypoxic effects. Laboratory studies have proven the ability of living cells to absorb oxygen more intensively during the period of application of succinic acid. Even weakened by negative environmental factors, the body increases its resources due to the intake of succinic acid: energy exchange is restored, and the process of production of new cells is normalized.

Pinalex® is recommended for use in the complex therapy of eye diseases, in case of visual strain, "dry eye" syndrome, secondary degenerative processes in the retina on the background of injuries, glaucoma, angiopathy and dry form of macular degeneration. It is also recommended for the restoration of the function of the organ of vision in the postoperative period.

In case of retinal vein thrombosis, atherosclerotic and diabetic angiopathy, Pinalex® improves the condition of blood vessels, pigment epithelium metabolism and cellular respiration, accelerates the restoration of retinal light sensitivity, increases its resistance to hypoxia and ischemia.

Active ingredients: peptide complexes: AA-3 (peptide of the B-link of the immune system), AA-6 (peptide of the retina), AA-7 (peptide of the vascular wall), panthenol, hyaluronic acid, succinic acid.

Instructions: use 3-6 drops 1-3 times a day; apply to the skin around the eyes. Getting the balm into the conjunctival space is provided for by special conditions for the production of the drug and allows you to achieve a more pronounced restorative effect.

10ml

Reviform® Cocktail

body and weight correction

Considering the demands of consumers and the latest trends in nutrition, Peptides laboratory specialists have updated not only the packaging design, but also the composition of the product, including an easily digestible protein in its formula and reducing the content of soy proteins, which can significantly improve the functioning of the gastrointestinal tract. In addition, due to the coconut powder, the taste properties of the product were improved.

An optimal balance of proteins distinguishes Reviform® Cocktail, and the rich content of vitamins and minerals that make up the drink makes it an indispensable assistant in achieving the “dream” body. It saturates the body with the necessary energy, has a rejuvenating and antioxidant effect.

The high content of fiber, enzymes, and natural extracts will not only help to safely reduce weight, but will also have a strengthening effect on the entire body. Under the condition of regular use, the stool is normalized, the mucous membrane of the gastrointestinal tract is restored, the secretion of glands is normalized and the acidity of gastric juice is reduced.

Reviform® Cocktail helps fight chronic fatigue, stressful conditions, irritability, stimulates metabolic processes in the body, and helps prevent cardiovascular diseases. This cocktail will become an indispensable tool when traveling or on a business trip, when it is not possible to cook food at home. It is a complete replacement for one meal a day and a great alternative to unhealthy snacks that negatively affect your body.

It is recommended for weight correction, improvement of the excretory system, stimulation of metabolic processes in the body and burning of adipose tissue, and for the prevention of obesity and cardiovascular diseases.

Active ingredients: isolated soy protein, skimmed milk powder, coconut powder, whey protein concentrate, chicory inulin, soluble dietary fiber (gum arabic), vitamins: C, B₁, B₆, B₁₂, PP, folic acid, calcium pantothenate, biotin; iron, manganese, copper, iodine, selenium, zinc.

Instructions: Pour 2 tablespoons (25 g of powder) into a glass, add a little bit of boiled water or milk (room temperature), and mix intensively until an appetizing foam forms on top. Then add the rest of the liquid (at the rate of 25 g of powder per 200-250 ml). The cocktail should be prepared immediately before use

 dry mix 375 g

Reviform® oil blend

source of omega-3, omega-6, omega-9

Vegetable oil fats are very important for maintaining the health of our body, because the macro- and microelements contained in them, unsaturated fatty acids and a complex of vitamins, have a beneficial effect and prevent thrombosis, inflammatory processes, normalize blood pressure, promote good digestion and help increase immunity. As our bodies do not produce the necessary components, which are a part of vegetable oils, for perfect health on its own, we are required to find those nutrients elsewhere. The only daily source of these nutrients is food.

Therefore, a blend of vegetable oils, rich in many unsaturated fatty acids, macro- and microelements, is considered the best product for a complete balanced diet. Vegetable fats contain a complex of vitamins A, E, C, D, K and polyunsaturated fatty acids necessary for the normal functioning of many biochemical processes in the human body. For example, olive oil, which is part of the blend, is famous for its mild laxative effect, stimulates the secretion of bile and prevents the formation of gallstones. Plus, it has been scientifically proven that the use of olive oil reduces the risk of intestinal tumors.

The rich composition of milk thistle oil (the presence in it of a large amount of vitamins B, E and D, selenium, potassium, magnesium, iron and other trace elements), which is included in the blend, allows you to successfully fight not only liver diseases, but also helps to cleanse the body of toxins, and improve the work of the stomach and pancreas. This unique oil does not have any pronounced taste, and its aroma is slightly nutty.

The Reviform® oil blend is recommended for high-quality balanced nutrition, increasing the overall tone of the body, and preventing diseases of the gastrointestinal tract, liver and biliary tract.

A natural healthy composition, which can be added to any dish of your usual diet, making it both healthy and tasty.

Active ingredients: oils: sunflower seeds, olive fruits, camelina seeds, linseed, milk thistle seeds, sesame seeds, grape seeds.

Instructions: Use as an addition to cold and hot dishes to enrich them with valuable poly- and monounsaturated fatty acids and give them a pleasant taste and aroma.

 170 ml

Mesotel for internal use

Natural antioxidant anti-aging agents

Mesotel for internal use refers to the basic means of revitalization and includes four generations: "Mesotel" based on choline and extracts of gotu kola and boxthorn, "Mesotel Beauty", enriched with zinc and selenium, "Mesotel Neo", which includes not only the active substances listed above, but also resveratrol – a natural phytoalexin, "Mesotel Tabs", which, among other components, includes glycine and vitamin B6. The course use of mesotels significantly im-

proves cerebral circulation, the work of the cardiovascular, nervous and immune systems, accelerates metabolic processes, and reduces the risk of oncopathology. All components included in their composition are selected in such a way and in such proportions as to modulate and enhance each other's action.

 120 ml

Use Recommendations: 1 teaspoon 1-2 times a day during meals. The duration of admission is 1 month. You can repeat the course of treatment, if necessary.

 30 tablets of 0.6 g

Use Recommendations: 1 tablet 1 time per day during meals in the morning. Duration of admission – 4-6 weeks. You can repeat the course of treatment, if necessary.

Mesotel

based on choline

Mesotel is recommended for improving cerebral circulation and for the rehabilitation after a stroke. It also improves the functioning of the central nervous system, neuromuscular conduction, antioxidant protection of the body, increases immunity, and general rejuvenation of the body.

Active Ingredients: gotu kola and boxthorn extracts.

Mesotel Beauty

with zinc and vitamins

Mesotel Beauty is recommended for improving cerebral circulation, the functioning of the central nervous system, rehabilitation after a stroke, prevention of oncopathology, antioxidant protection of the body, increasing immunity, and preventing aging.

Active ingredients: gotu kola and boxthorn extracts, zinc lactate, sodium selenite.

Mesotel Neo

with resveratrol

Mesotel Neo is recommended for improving cerebral circulation, preventing atherosclerosis, normalizing lipid metabolism, improving neuromuscular conduction and functioning of the central nervous system, preventing oncopathology, the rehabilitation after a heart attack and stroke, increasing immunity, antioxidant protection of the body, and preventing aging.

Active Ingredients: Choline Bitartrate, Gotu Kola and Boxthorn Extracts, Zinc Lactate, Sodium Selenite, Resveratrol.

Mesotel Tabs

with resveratrol, glycine, vitamin B6

Mesotel Tabs is recommended for antioxidant and anti-stress protection of the body, improving cerebral circulation, improving the functioning of the central nervous system, increasing mental performance, restoring memory and concentration, improving metabolic processes in the body, and slowing down the aging process at the cellular level.

Active ingredients: glycine, choline bitartrate, green tea extract, resveratrol, pyridoxine hydrochloride.

Progressive technologies for fighting the disease of the 21st century

Oncoseries products are currently in the company's spotlight. These drugs are aimed at preventing cancer and supporting cancer patients in combination with the routine therapy.

We have developed and put into practice five drugs: the basic oncoprotector "Ensil", which is used in case of the presence of underlying diseases that predispose to the development of oncopathology. A broad-spectrum oncoprotector – "Revifort", used both in case of the presence of background diseases and in the presence of oncopathology in order to increase the effectiveness of the main methods of treatment and improve its long-term results in cancer patients. A chemo- and radioprotector – "Reviplant", is a complex drug that supports the functions of the main organs and systems during chemotherapy and radiation therapy and has an auxiliary antitumor effect. The immunomodulator "Levain" enhances by several times the effect of antitumor drugs that destroy the structure of cancer cells, significantly improving the results of the treatment. The detoxification agent "Likam" is designed to prevent and reduce the side effects of chemotherapy.

Ensil®
basic oncoprotector

This oncoprotective complex improves the parameters of tissue respiration and regeneration. Its action is carried out due to the synergy of its highly effective components.

Recommended in case of immunodeficiencies of various origins, for the prevention of cancer, rehabilitation after severe injuries and past illnesses, after heart attacks and strokes. It is also used for admission in the pre- and postoperative period, in case of degenerative diseases of the joints and spine, chronic respiratory diseases, diseases of the gastrointestinal tract and urinary tract, hypovitaminosis, metabolic disorders and redox processes in the body, in case of increased physical activity, and for the prevention of premature aging.

Active ingredients: L-carnitine, L-cysteine, succinic acid, echinacea extract, vitamins: A, B1, B2, B5, B6, B12, C, D3, E, PP, folic acid, biotin, coenzyme Q10.

Instructions: 1 capsule 3 times a day with meals. The duration of admission is 1 month.

90 capsules of 0.31 g

Revifort®
broad-spectrum oncoprotector

Combines the achievements of oriental and classical medicine. For the first time, such representatives of the fungal kingdom as shiitake, reishi, maitake and cordyceps are united together – practically the only natural sources of substances from the glucan group, forcing the immune system to actively destroy tumor cells even in the very epicenter of the tumor.

Recommended for the prevention of oncopathology; as part of the complex treatment of cancer patients with different localization and stage of the process, in case of various immunodeficiencies, systemic lupus erythematosus, scleroderma, rheumatism, combined cardiovascular pathology, multiple sclerosis, chronic hepatitis, diabetes mellitus, prevention of premature aging, and in case of metabolic disorders.

Active ingredients: mushroom extracts: shiitake, reishi, maitake, cordyceps; echinacea purpurea extract; zinc citrate, kelp thallus extract, sodium selenite.

Instructions: Adults: 1 capsule 2 times a day with meals. The duration of admission is 1 month. The break between courses of treatment has to be at least 10 days.

60 capsules of 0.31 g

Reviplant®
new generation chemo- and radioprotector

Designed to reduce the damaging effects on healthy organs and tissues of toxic antitumor therapy (chemotherapy, radiation therapy). The drug helps to carry out a full course of toxic therapy without interruption caused by the side effects of this treatment. It contains an advanced complex of amino acids and plant extracts.

It is recommended for the prevention and compensation of secondary immunodeficiency conditions caused by radiation and chemical factors, to increase the body's resistance to intoxication, infections, radiation, to correct metabolic processes, to reduce pain, to increase the effectiveness of treatment and improve the well-being of cancer patients.

Active ingredients: valine, arginine, taurine, leucine, isoleucine; extracts: artichoke, wild rose, burdock, leuzea, chaga.

Instructions: 1 teaspoon 2 times a day. The duration of admission is 20 days.

200 ml

Levain®
anti-stress immunomodulatory

It is used in case of autoimmune diseases to improve the functioning of the circulatory system, the central nervous system, and reduce the risk of developing pathologies associated with the lymphatic system. In oncological diseases, it is used as part of complex therapy; it reduces the risk of metastasis in the lymph nodes, and has a limiting effect on tumor growth.

It is recommended in case of oncological diseases as part of complex therapy, with a decrease in immunity, to improve blood circulation and lipid metabolism, to increase tone and improve well-being.

Active ingredients: extracts: leuzea, amaranth, eleutherococcus, willow-herb (fireweed), Rhodiola rosea, plantain, St. John's wort, licorice, lemongrass.

Instructions: 1 tablet once a day with meals. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

30 tablets of 0.3 g

Likam®
complex detoxification of the body

It is an effective gero- and oncoprotector, which has a general strengthening effect on the entire body. In oncological diseases, it prevents and reduces the negative consequences of the use of chemotherapy and toxic substances that are part of most effective anticancer drugs.

It is recommended in case of oncological diseases as part of complex therapy, in case of pain syndrome, to strengthen the vascular wall, in case of chronic intoxication of the body of various etiologies, in case of toxic vascular lesions, alcohol and chronic drug intoxication, and long-term antibiotic therapy.

Active ingredients: natural pine complex, lycopene, astragalus extract, resveratrol, amino acids: arginine, glycine, glutamic acid, aspartic acid, alanine, 5-hydroxytryptophan (5-HTR).

Instructions: 1 tablet once a day with meals. The duration of admission is 1 month. It is possible to repeat the course of treatment 3-4 times a year.

30 tablets of 0.3 g

AYURVEDA PHYTOTEA

Herbal teas "Ayurveda"— the healing power of nature

Peptides created a whole line of Ayurveda herbal teas based on Ayurvedic and traditional herbs and spices, especially for restoring the functions of various body systems and slowing down aging. Each of the presented recipes is based on the principle of bringing the processes inside the body into balance.

Herbal teas of the Ayurveda series, in addition to vitamins and minerals, include amino acids, essential oils, tannins

and many other useful compounds. The unique composition of the base teas helps to detoxify the body, strengthen the immune system, restore the functions of the gastrointestinal tract and normalize digestion.

Compose your palette of flavors from the Ayurveda series of tea drinks and discover their natural power.

tea drink with pineapple flavor
25 filter packets of 1.5 g each

25 filter bags

Instructions: use according to the recommendations set out in the "Complex use of products."

TEA	PURPOSE	RECOMMENDED	INGREDIENTS
ALVENORM®	Tea for the normalization of the respiratory system. It has antiseptic, anti-inflammatory, anti-allergic and expectorant effects. Facilitates the course of respiratory diseases. Helps improve bronchial patency.	<ul style="list-style-type: none"> • In case of catarrhal phenomena of the lower respiratory tract; • In case of chronic bronchitis; • In case of obstructive pulmonary diseases; • In case of respiratory allergies and asthma with pneumosclerosis and emphysema. 	Carnation, calendula flowers, rose hip, marshmallow roots, linden flowers, green tea.
BILINORM®	Tea to improve the functioning of the liver and biliary tract. It has a detoxifying, immunomodulatory, anti-inflammatory, as well as a moderate antispasmodic and choleric effects. Helps to alleviate the course of chronic diseases of the liver, gallbladder, musculoskeletal system. Improves skin condition.	<ul style="list-style-type: none"> • In case of chronic hepatitis of any etiology; • In case of postcholecystectomy syndrome; • In case of intoxication; • In case of cholecystitis and biliary dyskinesia; • In case of diseases of the joints; • In case of skin diseases. 	Nettle leaf, calamus rhizomes, mint, horsetail, yarrow herb, flax seeds, turmeric and dandelion root, birch leaf, green tea.
VEDOMIX®	Tea to cleanse the body of toxins. Promotes the elimination of toxins and salts of heavy metals. Normalizes the processes of secretion and absorption in the intestine and the composition of the microflora. It activates intestinal peristalsis, helps to control body weight.	<ul style="list-style-type: none"> • In case of chronic fatigue syndrome; • In case of chronic intoxication; • In case of disorders of digestion and microflora; • When carrying out complex cleanse programs. 	Cardamom fruits, ginger root, emblica (amla) fruit extract, green tea.
GELMAX®	Tea with immunomodulatory and antiparasitic properties. Relieves symptoms of intoxication of the body. Increases tone and immunity. Normalizes bowel function. Prevents the growth of fungal flora after antibiotic therapy.	<ul style="list-style-type: none"> • In conditions caused by immunosuppression; • In case of parasitic and fungal invasions; • In case of chronic intoxication; • In case of dysbacteriosis; • When carrying out complex cleanse programs. 	Ginger root, buckthorn bark, cloves, peppermint herb, licorice root, St. John's wort, cinnamon, cardamom fruit, amla fruit extract, green tea.
DIANORM®	Tea for the normalization of the stomach, duodenum and pancreas. Normalizes the formation of digestive enzymes and insulin. Protects the lining of the stomach and intestines from damage. Reduces the pressure on the pancreas. It has a smooth sugar-reducing effect. Prevents the development of vascular complications in diabetes.	<ul style="list-style-type: none"> • In case of gastroduodenitis and peptic ulcer; • In case of digestive disorders caused by pancreatic dysfunction; • For the prevention of diabetic angiopathy of the lower extremities and retina; • In case of diabetes mellitus of the 1st and 2nd type; • In case of chronic pancreatitis. 	Root: ginger, marshmallow, licorice; dill seeds, blueberry shoots, yarrow herb, chamomile and calendula flowers, eucalyptus leaves, green tea.

TEA	PURPOSE	RECOMMENDED	INGREDIENTS
KORGITON®	Tea for the normalization of the cardiovascular system. Improves trophic processes in atherosclerosis in the vascular wall. Normalizes metabolism in the heart muscle. Reduces the pressure on the myocardium. It has a very smooth antiarrhythmic effect.	<ul style="list-style-type: none"> • In case of vegetative-vascular dystonia and meteorological dependence; • In case of heart failure and arterial hypertension; • In case of ischemic heart disease; • For the prevention of atherosclerosis, heart attacks and strokes as part of comprehensive programs 	Plantain leaf, calendula flowers, nettle leaf, rose hips and hawthorn, lingonberry leaf, birch leaf, green tea.
RELANORM®	Tea for the normalization of the central nervous system. Reduces pressure and increases resistance to stress. Helps normalize the sleep-wake cycle. It has an immunomodulatory effect.	<ul style="list-style-type: none"> • In case of chronic fatigue syndrome; • In case of sleep disorders; • In case of stress and depression; • In case of a decrease in memory and concentration; • When carrying out complex cleanse programs 	Carnation, basil herb, cinnamon, licorice root, lemon balm herb, ginger root, calendula flowers, motherwort herb, green tea.
FLONORM®	Tea for the normalization of the urinary tract. It has a moderate anti-inflammatory, antispasmodic, diuretic effect. Prevents the development of stone formation in the kidneys. Helps relieve chronic kidney disease and gout.	<ul style="list-style-type: none"> • In case of chronic pyelonephritis; • In case of interstitial nephritis; • At the initial stages of renal failure; • In case of urolithiasis; • In case of disorders of water-salt metabolism and gout 	Lemon zest, peppermint and horsetail grass, lingonberry leaf, bearberry leaf, nettle leaf, rose hips, green tea.
PERFECT SHAPE WITH PINEAPPLE® FLAVOUR	Herbal tea "Perfect Shape" is an effective tool for body shaping and normalization of the composition of the intestinal microflora.	<ul style="list-style-type: none"> • Helps to reduce the absorption of fats in the intestines; • Helps with weight correction; • Improves intestinal motility; • Promotes the removal of toxins; • Has a moderate laxative effect 	Senna Alexandrina leaves, hibiscus flowers, flax seeds, dill seeds, kelp thallus, green tea.
PERFECT SHAPE WITH BLUEBERRY® FLAVOUR	Herbal tea "Perfect Shape" is an effective tool for body shaping and normalization of the composition of the intestinal microflora.	<ul style="list-style-type: none"> • Helps to reduce the absorption of fats in the intestines; • Helps with weight correction; • Improves intestinal motility; • Promotes the removal of toxins; • Has a moderate laxative effect 	Senna Alexandrina leaves, hibiscus flowers, flax seeds, dill seeds, kelp thallus, green tea.

THE ENERGY OF BRILLIANT EXCELLENCE

Promising anti-age technologies

At the intersection of art and science, on the verge of dream and reality, thanks to a combination of skill and talent, an incredible anti-age trio was created to combat aging:
Health-Beauty-Activity

Health. The multifunctional AGE protector is aimed at slowing down the aging process, anti-stress and antioxidant protection of the body, as well as maintaining a normal level of metabolic processes. Powerful peptide substances in combination with antioxidants of natural origin literally rejuvenate the neuroendocrine, immune and reproductive systems; effectively cope with fatigue, stress, insomnia and premature age-related changes.

Beauty. Anti-glycation and anti-wrinkle face serum is an activator of the youth code and the realization of the dream of perfect wrinkle-free beauty. The combination of professional peptides and highly active biotechnological complexes is a real breakthrough in the field of revitalizers and anti-age cosmetology. The main tasks of the serum are: remodeling of all skin structures, combating glycation, the main enemy of collagen, and a quick lifting effect.

Activity. Beverage concentrate for replenishing the energy of the body. A professional in the fight against age-related changes: protects the body from glycation and free radicals, improves metabolism, memory, improves efficiency and concentration, helps to cope with mental and physical overload, insomnia, strengthens the joints; improves the appearance of the skin (fights wrinkles and other imperfections).

Active ingredients: peptide complexes: pineal gland peptide (AA-1), peptide of the B-link of the immune system (AA-3), glutamic acid, aspartic acid, astragalus extract, 5-hydroxytryptophan (griffonia extract), folic acid (vitamin B9).

Instructions: Adults are recommended to take 1 capsule a day with food. Duration of admission – 4-6 weeks. If necessary, the course of treatment can be repeated throughout the year.

Release form: jar, 30 capsules

Active ingredients: Matrixyl® synthe6TM, ProdziaTM (albizia bark extract), Moist-24™ (imperiala cylindric extract), Liftessense™ (cyathea cumingii fern leaf extract), Syn@-Ake, extracts of: red clover flowers, rosemary, sage, Jerusalem artichoke.

Instructions: Depending on age, use the serum 1-2 times a day. For maximum effect, use the serum regularly for at least 28-30 days, 3-4 times a year.

Release form: cosmetic syringe, 15 ml

Active ingredients: peptide complexes: immune system B-link peptide (AA-3), cartilage peptide (AA-9), rosemary extract, astaxanthin (hematococcus extract), SOD (barley sprout extract), ginseng root extract, alpha lipoic acid.

Instructions: Dissolve 25 drops of the concentrate in 100 ml of drinking water at room temperature, drink in the morning.

Release form: bottle, 50 ml
